Summary:

Frontend-focused Fullstack Developer with 7+ years of experience building production web applications for gaming, fintech and edtech products. Core stack is React (Next.js), Vue (Nuxt) and TypeScript: data-dense and real-time UIs, animation, i18n (up to 29 languages, incl. RTL), accessibility and Core Web Vitals performance. On the backend I build APIs and data contracts with Node.js (Express, NestJS), Python (Django) and PHP (Laravel). A responsible and proactive feature owner who takes work end-to-end from data model to interface and ships high-traffic features to fixed deadlines.

Skills:

- HTML5, CSS3/SASS, JavaScript (ES6+), TypeScript (strict mode, Zod), jQuery, WebAPIs, Browser APIs, Canvas API, SVG, WebGL, Three.js (basics), Server-Sent Events (SSE), OOP
- React 19 (Lifecycles, Hooks, React Router, Reconciliation, Fiber, Concurrent mode, Server Components), Next.js 16 (App Router), Material UI, TailwindCSS, CSS Modules, Styled Components, CSS-in-JS, Bootstrap, shadcn/ui, HeroUI, React Hook Form, Formik
- TanStack suite (TanStack Router, TanStack Query, TanStack Table, TanStack Virtual), RTK Query
- Zustand, Mobx, Redux Toolkit
- Vue 3.5 (Composition API, Vue Router), Nuxt 4, Pinia / Vuex, Element Plus / Element UI
- GSAP, Motion
- Accessibility / a11y (semantic markup, keyboard navigation, focus management, ARIA, WCAG 2.2)
- Internationalization / i18n (react-i18next, next-intl, vue-i18n, pluralization & ICU messages, locale-aware formatting via Intl API, RTL support)
- Auth and security: JWT, OAuth2, CSP
- Vite, Webpack, Gulp
- Monorepo (pnpm/npm workspaces), Nx, Turborepo
- Testing: Jest, Vitest, React Testing Library, Playwright, Cypress
- Pug, Twig, Handlebars, Liquid
- Git, SVN
- Drupal 8, Craft CMS 4/5, Custom CMS creation
- WebAssembly (Rust), Web Workers, Web Audio API, AudioWorklet, PWA, Coherent Gameface (in-game UI)
- Backend and data: Node.js (Express, NestJs), PHP (Laravel), Python (Django), Prisma, Redis, SQL (queries, joins, optimization), MySQL, PostgreSQL, MongoDB, RESTful APIs, GraphQL, WebSockets, OpenAPI, webhooks, Stripe
- Docker, CI/CD (GitLab CI, GitHub Actions), AWS CodePipeline
- Working with Figma, Agile workflow
- Responsive Design and Mobile-First Development, HTML email templates

- Website Performance Optimisation (Core Web Vitals: LCP, CLS, INP), SEO optimisation, image optimisation, Lighthouse
- System design, Frontend Architecture, Design Systems (component libraries, design tokens), Modern Rendering Architectures (SPA, SSR, SSG, ISR), Cross-Browser Compatibility, Radix, Feature-Sliced Design, Storybook, feature flags
- Frontend tooling, code reviews and DX: linting, formatting, type checks, CI gates
- Working with agentic AI development (Claude, ChatGPT etc) for agentic development workflows, incl. Claude Code
- Ability to mentor developers and take on technical leadership responsibilities
- Strong problem-solving and debugging skills, attention to detail and ability to work independently in a remote environment

Experience:

Independent (Self-employed) | Frontend / Fullstack Developer
Apr 2026 - Present | Belgrade, Serbia

- Building WizardTuner, a PWA for musicians with a tuner, metronome, beat machine and ear-training games. Low-latency audio runs on a dedicated audio thread.
- Building JobScraper, a job-aggregation tool that collects listings from multiple international and Serbian job boards with keyword, location and work-type filters.

Stack: Next.js (App Router), React 19, TypeScript, Zustand, Zod, Web Audio API, AudioWorklet, WebAssembly (Rust), Node.js, NestJS, JavaScript, HTML, CSS, Vite, Tailwind

Wargaming | Frontend-Focused Fullstack Developer
Sep 2022 - Apr 2026 | Belgrade, Serbia

- Rebuilt the World of Tanks 2.0 Hangar, the game's primary navigation surface (main page, vehicle carousel, central vehicle button), serving 5800+ concurrent players (10000+ at peak) in 29 languages.
- Built in-game event UI for live-ops and clan-mode features shipped to fixed launch dates (Pet System, Holiday Ops 24/25 and 25/26, Strongholds Event, Clan Supply, Tournaments, Clan Winter Event): real-time notifications, live timers and progress bars, leaderboard tables with filtering, pagination, virtualization and expandable rows, animations and mini-games. Worked with game designers, UX/UI, backend and QA on each launch.
- Built backend endpoints in Django with data-aggregation logic and defined BE/FE data contracts around the game client's UI constraints; changes went through the backend team's code review.
- Reviewed pull requests for a team of 5 frontend / fullstack developers.

Stack: React, MobX, Next.js, TypeScript, JavaScript, HTML, CSS, Coherent Gameface, Python, Django, Docker, Redis

Libertex | Frontend Developer
Apr 2021 - Aug 2022 | Podgorica, Montenegro

- Built a real-time trading data table streaming live prices for 15–20 instruments (stocks, crypto and more) at ~1-second intervals without render degradation, widgets embedded in the existing CMS platform.
- Led motion and interaction implementation for the trading UI, setting animation guidelines adopted by 4 frontend developers.
- Implemented multi-language support across 16 languages, including full right-to-left layout for Arabic, with per-locale URLs, hreflang and localized meta. Took part in the

migration from Drupal to headless Drupal + Nuxt; URLs were kept or 301-redirected, the site stayed fully indexed and key landing pages passed Core Web Vitals.

Stack: Vue, Nuxt, JavaScript, SSE, Drupal, PHP, Twig, Sass, Docker

Freelance | Frontend / Fullstack Engineer
Aug 2020 - Mar 2021 | Remote

- Completed 28 Upwork projects with a 4.9/5 rating and 100% Job Success: responsive sites built from designs, animation work, a browser-based lottery game with backend integration and a Flash-to-JavaScript migration.
- Worked on a crypto exchange aggregator, integrating real-time feeds from multiple exchange APIs.

Stack: Vue, Node.js, Express, PHP, Laravel, JavaScript, HTML, CSS, Bootstrap, WebGL, SVG, WebSockets

Edulastic | Fullstack Engineer
Nov 2019 - Jul 2020 | Remote

- Owned the custom graphing engine end-to-end for an assessment platform used by school districts across Alaska, from client-side rendering to the data contracts behind real-time auto-grading and kept it stable under continuous input during live tests.
- Built interactive geometry modules (trigonometry, coordinate geometry) for student assessments.

Stack: React, Redux, Canvas API, Node.js, Express, JavaScript

Lloyd Hardy Enterprises | Fullstack Engineer
Feb 2019 - Oct 2019 | Remote

- Built and maintained a proprietary CMS end-to-end: backend logic, REST API endpoints, admin features and client-facing pages.
- Developed interactive frontend modules with cross-browser, responsive UI.

Stack: PHP, Laravel, MySQL, REST APIs, JavaScript, jQuery

Tribefire | Frontend Developer
Sep 2018 - Jan 2019 | Remote

- Built the core interface for a streamer platform, with reactive components for live-data broadcasting.
- Built donation and checkout UI with payment integration and real-time donation alerts.

Stack: Vue.js, JavaScript, Stripe

Languages:

English (B2), Russian (native), Serbian (B1)
